## **DETAILED ACTION**

### ***Election/Restrictions***

Claims 1-76, 81-84 and 93-100 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 1-9-2009.

### ***Specification***

The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: The element "memory means" has no antecedent in the specification for the term and it is thus uncertain what it encompasses.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 77-80 and 85-92 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Since there is no antecedent basis in the specification for the "memory means", one cannot discern what the scope of the claim is. In addition, the proper use of means language includes "for", i.e. "means for". As a result of the applicant's use of alternative language, it is unclear if applicant is invoking 112 6<sup>th</sup> paragraph protections or not.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 77-80, 85-92 are rejected under 35 U.S.C. 102(b) as being anticipate by a conventional personal computer. As written, the memory means has the intended use of storing a program, and the processor has the capability of executing the program of intended use. Any personal computer would be capable of storing such a program and executing the calculations. To be more consistent with applicant's specification and to give the program steps weight the examiner suggests applicant recite a computer readable media having code for performing the steps and a processor for executing the steps in the code.

***Response to Arguments***

Applicant's arguments with respect to claims 77-80, 85-92 have been considered but are moot in view of the new ground(s) of rejection.
